P.O. Box 2070 1322 Washington St. Port Townsend, WA 98368 (360) 385-9160

June 5, 2000

Gary A. Rowe, P.E., Public Works Director/County Engineer

Jim McGillis 782 Bywater Way Port Ludlow, WA 98365

Re: Bywater Bay R.I.D.

Dear Mr. McGillis:

Two 1999 estimates are enclosed for the Bywater Bay R.I.D. The only difference between the estimates is that one reflects the purchase of right-of-way and the other donation of right-of-way.

These estimates reflect the cost to upgrade the roads to the minimum current County standard, which is an 18 to 20-foot paved surface, depending on traffic volumes, underlain by 4 inches of crushed surfacing top course. The existing gravel base was assumed to be adequate, and therefore the item "Gravel Base", shown on the roadway template in the 1996 Design Report, was not included in the estimate. The excavation quantities were necessary to widen to road, shoulders, and ditches to the County minimum standards (shown in the 1996 Design Report) and to make minor curve realignments. These costs would not necessarily be incurred if the property owners were to merely pave the existing surface.

The costs reflected in the estimate are <u>in-place</u> costs based on past project experience and typical estimating procedures used by the County. These costs reflect construction performed with State prevailing wage requirements, under which a private venture would not be required to operate. The cost of an item such as "Crushed Surfacing Top Course", includes the cost for the material, haul, placement, and compaction, all performed at the premium rates mandated by prevailing wage laws.

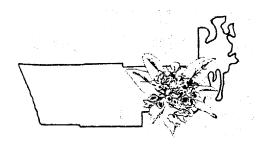

The Bywater Bay RID estimate used a 2-shot BST (chip seal) surface at a cost of \$16,000 - \$20,000 per mile for the required width. Class A or B asphalt concrete is substantially more expensive. For a job of this size, the County would probably expect to pay an <u>in-place</u> cost of about \$45.00 per ton for asphalt.

Sincerely,

Monte Reinders, P.E.

**Engineer III**

Klara A. Fabry, P.E., Public Works Director/County Engineer

# DESIGN REPORT BYWATER BAY ROAD IMPROVEMENT DISTRICT PROJECT NO. R01258

#### PROJECT DESCRIPTION

The Company of Marine Company of the Company of the

This project is for a road improvement district located one half mile north of the Hood Canal Bridge along Paradise Bay Road. The purpose of this project is to upgrade approximately 2.75 miles of gravel road to Jefferson County standards. It is assumed that the new centerline will follow as near as possible the existing platted centerline.

The majority of the horizontal and vertical alignment appears to be adequate. There are four areas that exceed the recommended maximum grade. One of the locations may be correctable. The other three areas will probably remain close to the existing grades.

All intersections within the proposed R.I.D. will have a "T" configuration with the exception of the intersection of Hoodsview CT. and Bywater Way. The existing configuration at this intersection is a "Y". Because of the terrain at this location and the 3R nature of the project, it is recommended that this intersection remain as existing.

#### PROJECT SUMMARY

This R.I.D. project will be divided into two roadway sections. Roadway Section "A" will be constructed on Bywater Way from milepost 0.00 (Paradise Bay Rd.) to milepost 0.47 (Olympic Ridge Dr./Bywater Way intersection). Roadway Section "B" will be constructed on the remaining length of Bywater Way, Bywater Way N., Hidden Springs Dr., Olympic Ridge Dr., Hoodsview CT., Parkview Ln., and Shipview CT. Typical roadway sections for both "A" and "B" are attached to their respective Road Design Worksheets.

This project is classified as 3R rehabilitation since no major revisions are planned for horizontal or vertical alignments. All roadways within the R.I.D. will have a functional classification of "09", Rural Local Access.

#### **MAPS**

Attachment 1 shows a plat map of the area with the existing roadway layout.

## ENVIRONMENTAL CONCERNS

At a minimum, SEPA review will be required. Permits may be required for Hydraulics approval and for Forest Practices.

#### **PUBLIC MEETING**

Public Works may want to consider meeting with the people within this R.I.D. prior to final design approval.

#### TRAFFIC DATA

Traffic counts were taken by Public works between December 2, 1996 and December 9, 1996. Future traffic projections for design purposes were estimated at 10 trip ends per lot at total build out. The projected traffic was then assigned to the appropriate routes. Attachment 2 shows a break down of the existing and proposed traffic on all roads within the R.I.D. area.

#### UTILITY INVOLVEMENT

Underground power, telephone, and water are present on this project. See attached Road Design Worksheets for specific contacts.

and the same with the same and the same and

The state of the s

ing the more arms and a second

#### CONTROL ZONE

See attached Road Design Worksheets.

# ROADWAY SECTION

See attached Road Design Worksheets.

#### HORIZONTAL AND VERTICAL ALIGNMENT

Burney of the Control of the Control

Most of the existing horizontal and vertical curves appear to be adequate. Once a survey is completed we will be able to identify any horizontal or vertical alignment changes that may be required.

#### **GRADES**

Most roadway grades are less than the maximum grade allowed of 12 percent. There are, however, four sections that exceed the maximum grade. Hidden Springs Dr. from milepost 0.01 to milepost 0.12 has existing grades from 12 % to 14 %; Hoodsview CT., m.p. 0.02 to m.p. 0.06, 15 %; Parkview Ln., m.p. 0.01 to m.p. 0.03, 15 %; and Parkview Ln., m.p. 0.09 to m.p. 0.16, 13 %. The section of Parkview Ln. from m.p. 0.01 to m.p. 0.03 should be corrected. There does not appear to be much that can be done to correct the other sections. Holding the existing grades in these areas is recommended.

#### DRAINAGE

The existing drainage system consist of open ditches and culverts. Most of the ditches and some of the approach culverts appear to be sub-standard and should be re-constructed to current standards. Some of the culverts may be to standards, but without an inventory this is unknown. An inventory of all culverts should be completed. A construction drainage plan will be required.

#### RIGHT OF WAY

The existing right of way consist of 60 foot platted streets. The position of the existing roadways within the right of way is unknown at this time. A survey would be required to determine the roadway locations or the need for additional right of way.

#### SIGNING

There are a few speed limit 20 signs and a stop sign existing on this project. These signs will need to be replaced. A new sign plan will be required for the entire project. The sign plan should follow the standards in the Manual on Uniform Traffic Control Devices.

#### **PAVEMENT MARKINGS**

All pavement markings shall be installed according to the requirements in the Manual on Uniform Traffic Control Devices. The only roadways that warrant centerline stripes are Bywater Way, from Paradise Bay Road to Hidden Springs Dr. and Hidden Springs Dr.

#### **DESIGN CRITERIA**

The design criteria used in the preparation of the Road Design Worksheets was based on two things. The typical roadway sections and maximum grades are based on Jefferson County Public Works approved typical road sections. All other criteria is based on the AASHTO Policy on Geometric Design of Highways and Streets, chapter five, Local Roads and Streets.

rentanti. 1940 - Angel Marie, Paris Marie Marie (1991), angel ange 1941-

# JEFFERSON COUNTY DEPARTMENT OF PUBLIC WORKS

P.O. Box 2070 1322 Washington St. Port Townsend, WA 98368 (360) 385-9160

Frank Gifford, Public Works Director/County Engineer

July 29, 1999

Re:

Termination of Bywater Bay Road Improvement District (R.I.D.) #3

Project No. GA1258

### Dear R.I.D. Participant:

This letter is written to advise you that the Bywater Bay Road Improvement District No. 3 has been terminated per the enclosed Jefferson County Resolution No. 61-99. This action was taken following a public meeting, which was held on July 19, 1999. The proposed road improvements and road acquisition are no longer being pursued by the County. The Department of Public Works encourages the participants of this former R.I.D. to work cooperatively and privately to address their road concerns. Road surveys and other work completed to date by the Department for this R.I.D. are available to authorized representatives of the property owners at no additional cost.

Any comments or questions should be directed to the Jefferson County Department of Public Works, (360) 385-9160.

Sincerely,

Monte Reinders
Project Manager

Enclosure:

Resolution 61-99

IN THE MATTER OF JEEFERSON COUNTY	)	RESOLUTION NO. 61-99
BYWATER BAY	)	
ROAD IMPROVEMENT DISTRICT NO. 3	)	TERMINATING RESOLUTION

WHEREAS, in accordance with Resolution No. 116-95, the hearing on the proposed formation of Road Improvement District No. 3 was scheduled to be held on January 8, 1996, before the Board of County Commissioners, and said hearing was rescheduled by the Board to January 23, 1996, and;

WHEREAS, in accordance with Resolution No. 125-95, the preliminary hearing on the proposed formation of Road Improvement District No. 3 was held on January 23,1996, before the Board of County Commissioners; and

WHEREAS, in accordance with Resolution 19-96, Road Improvement District No.3 was created on February 26, 1996; and

WHEREAS, following a public meeting with the property owners February 28, 1998, the Board of County Commissioners directed the Department of Public Works to prepare detailed cost estimates for improvements as defined per Resolution 19-96, and

WHEREAS, the Department of Public Works having completed aforementioned cost estimate, informed property owners of the revised cost estimates and surveyed the property owners as to the economic viability for the continuation of the RID No. 3, and

WHEREAS, the Department of Public Works then held an informational public meeting with the property owners and the Board of County Commissioners July 19, 1999, to discuss the results and findings of facts regarding the revised cost estimates and property owner survey. Whereupon the Department of Public Works presented the following facts:

- The revised 1999 estimated individual parcel assessment for road improvements (\$13,466.00 to \$15,461.00) for exceeds the original estimate (\$6,944 as provided per Jefferson County Resolution 19-96) and said revised assessment exceeds the special property benefit derived from the improvements.
- Based on the results of the April 1999, informal mail in property owner survey, the project does not appear
  to be supported by the majority of participants due to high cost, concerns about right-of-way width, loss of
  road privacy, and other factors.
- The roads within the Bywater Bay RID #3 would not adequately benefit the County road/transportation system and/or enhance overall County traffic circulation.

WHEREAS, after hearing public testimony on the proposed road improvement the Board did determine, by unanimous vote, to terminate the proceedings and dissolve Road Improvement District No. 3 as set forth in Resolution 19-98.

THEREFORE BE IT RESOLVED by the Board of County Commissioners of Jefferson County, Washington, that aff proceedings on Road Improvement District No. 3 are hereby terminated and dissolved.

IT IS FURTHER RESOLVED THAT and any road information, surveys, plans and standards utilized by the County in conjunction with this project shall be made available to the representatives of the former Road Improvement District No. 3, upon request at no additional cost.

PASSED AND ADOPTED By the Board of County Commissioners of Jefferson County, Washington, this 26th day of July, 1999.

APPROVED this 36 day of Tuley, 1999.
